

# Is your pet's diet causing health issues?

With so many pet food choices, pet food recalls and negative information, who doesn't worry about the food they are currently feeding?

Pet wellness begins with proper nutrition. It's the same with people but the big difference is that we get to choose what we put in our bodies every day. Our pets rely on us to make this important decision for them.

Every pet's dietary needs are different based on their age, health issues and activity level. That is why a custom nutrition plan created for your pet is so important.

Diet changes and/or specific supplements can resolve the following common pet issues:

- Allergies (Food & Seasonal)
- Anxiety/Stress (Storms/Fireworks/Travel/Separation)
- Bladder/Urinary Issues
- Coat Issues (Excessive Shedding/Dull Coat)
- Cognitive Issues in senior dogs
- Digestive Issues (Loose stool/Bad Gas/Sensitive Stomach/Eats Poop)
- Itchy/Smelly Ears
- Joint Issues
- Low Energy
- Skin Issues (Itchy/Dry/Flaky/Red/Irritated/Hot Spots)

Schedule a FREE no-obligation phone consultation to discuss your pet's individual needs/issues to see if nutrition and/or supplements may be in order to create the wellness you desire and they deserve.

There will be a drawing for a FREE bottle of a superfood meal topper for everyone that holds a consultation during Woofstock!

Every new customer will receive 20% off their first order (up to \$100)!

Free shipping on qualifying orders!
